Exercise 2-2 This is an individual exercise to practice setting up a new working alignment.

1. Open the Microstation file t:\br-proj\a_geopak\d2\j2p0300\data\topo_j2p0300.dgn.

3. Select **userc** as the Project User.

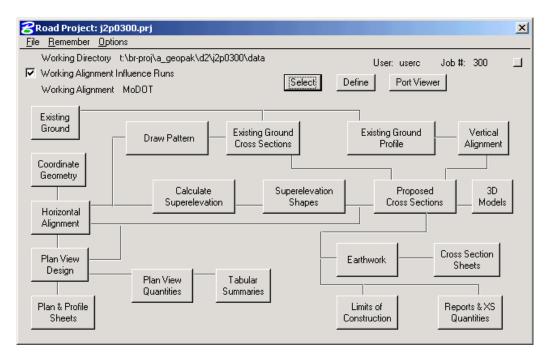

Ex. 2-2 Working Alignment Setup GEOPAK Road for Bridge

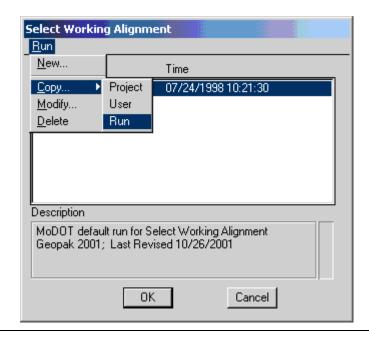

4. Select the Road Project.

5. Click on **Select** button at the top of the Road Project dialog as depicted below.

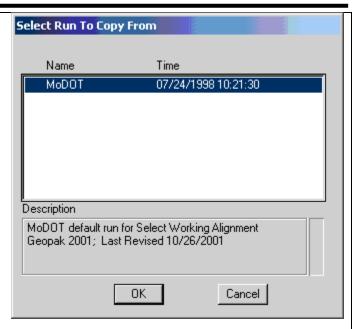

In the Select Working Alignment dialog that appears, select the menu option: **Run > Copy... > Run**.

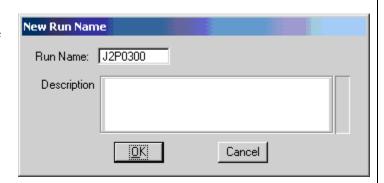

GEOPAK Road for Bridge Ex. 2-2 Working Alignment Setup

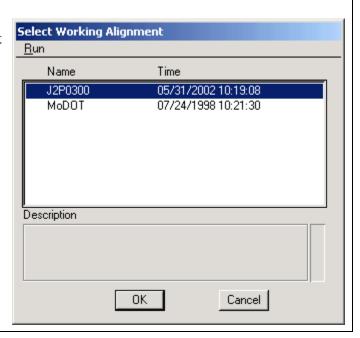

This will display the **Select Run to Copy From** dialog shown to the right.
Select the default MoDOT run and click **OK**.

Enter **J2P0300** in the new **Run Name** field as depicted in the figure to the right and click **OK** to create the new run.

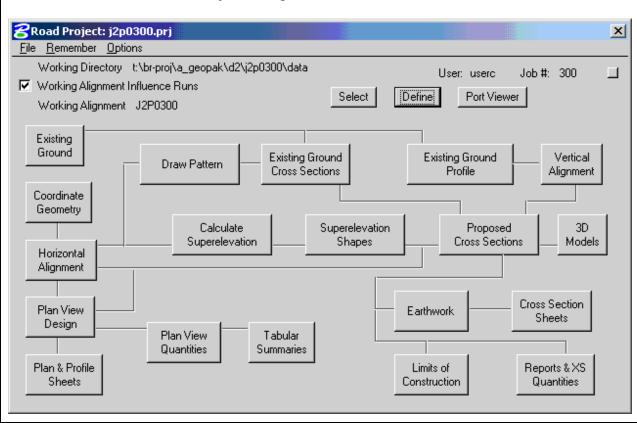

Select the **J2P0300** working alignment as shown below and enter the alignment by clicking **OK**.

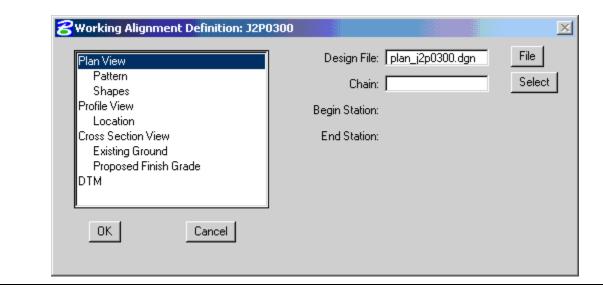

Ex. 2-2 Working Alignment Setup GEOPAK Road for Bridge

6. Enter the working alignment definition by clicking on the **Define** button to the right of the Select button in the Road Project dialog as shown below.

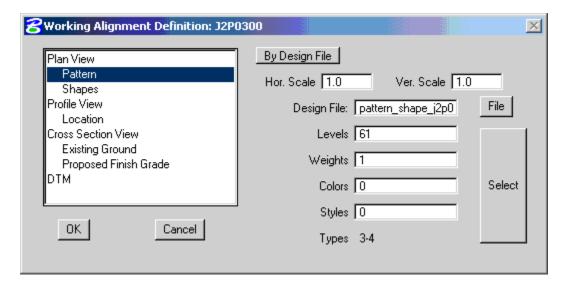

7. Set up the default DGN files for the J2P0300 project as shown below:

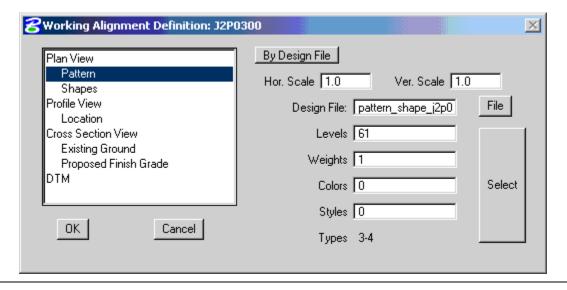

In the Plan View section, change the Design File to plan j2p0300.dgn.

In the Pattern section, change the Design File to pattern shape j2p0300.dgn.

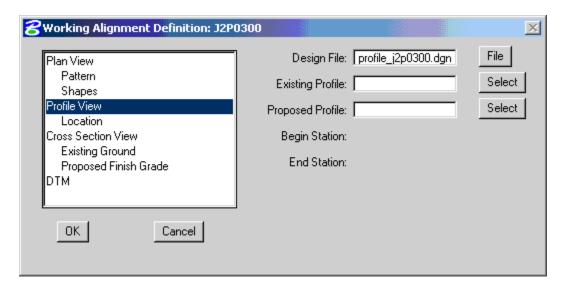

In the Shapes section, change the Design File to pattern_shape_j2p0300.dgn.

Ex. 2-2 Working Alignment Setup GEOPAK Road for Bridge

In the Profile View section, change the Design File to profile j2p0300.dgn.

Save the changes to the working alignment definition by clicking **OK**. This default alignment for the project will be modified and used as the basis for other parts of the project in later exercises.
